Mines and Mining Stocks

STAMPEDE ON

Sensational Gold Discovery in Granite District Has Sent the Country Wild.

this district since the silver excitement of the 70s has been on. Hundreds of men are locating in the new district as rapidly as they can find the ground

The Blaine has a shaft down to the depth of 300 feet, being an old company, and practically from the surface is in low grade ore, carrying values of from \$20 to \$35 to the ton. The Independence claim, which is situated some little distance from the main shaft, is being worked through a tunnel. At fifty feet in an 8-inch vein of bonanza ore was uncovered. Upon the news reaching Ely, a rush was started, which has continued with growing volume since. Enthusiasm over the district and its future marks the local atmosphere.

Locating for Miles.

Locations have been filed in every direction for several miles on ground which remained open. There are already many disputes over ownership of claims and in some cases ground has been located as many as four times. This is attributed to prospecting parties who have been grubstaked to locate for local people. Not wishing to spend time working for others which they could better employ in work-ing for themselves they have taken the

COPPER STOCKS IN **BOSTON AND NEW YORK**

Following is the daily market comment of Paine, Weber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York outh transactions report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this de-partment of The Herald:

Boston, March 28.—The traders took advantage of the bullish feeling to sel stocks today and the bull party simply stood aside and let the liquidation go on. Amalgamated and Union Pacific were the stocks sold most heavily, as they have been the speculative favorites lately. The weak holders will run on this reaction and the market will be all the bet-ter for it. On any further recession we advise the purchase of stocks.

Pierce Arrow Reliability

A 1907 30-H. P. Pierce acting as pilot car in the New York-Paris race, with all working parts sealed, even to the radiator cap, was driven from this city through mud, sand and snow, to Morgan, Utah, and returned without even an oil can being used, and the seals all intact. Mr. Bransford, the owner of the car, drove himself 140 miles over what was without doubt some of the worst roads encountered since the cars left New York. Any PIERCE car can duplicate this performance. Why, for the sake of a little difference in price, experiment? The purchase of a PIERCE ARROW gives the owner the satisfaction of KNOWING that he has the finest car built in America.

Ask Anyone.

Tom Botterill Auto Co. 62-64 West Third South St.

easy method of locating over claims already held legally.

There are several properties in the district which are working to advantage, while the surface croppings of the mineral belt extend north and south for more than thirty miles.

Townsite rights have been secured at the Blaine by Lieutenant Governor D. S. Dickerson and D. W. Ellis of Ely. Lots will be placed on sale formally tomorrow morning in Ely, but applications for many have been received already. Business houses have commenced to go up, two saloons, a restaurant, two lodging houses, an assay and engineering office and several tent houses being already on the ground.

Strike Eclipses Anything in Bawhide Strike Eclipses Anything in Rawhide

Ely, Nev., March 26.—Since ore running from \$500 to \$1,800 to the ton in gold was discovered last Friday on the Independence claim of the Blaine Mining company, in the Granite mining district twenty-five miles north of the city, a rush of proportions greater than any seen in this district since the silver excitement of the 170s has been on Hundreds of the 170s has been on the formula to knock that camp, I can safely say that the Blaine has a better showing than any mine in it. There is more development work in the Granite at as low at \$3.60 per 100 pounds, f. o. b. New York, which, by the logical thing, and if people know a good thing it is safe to say that we will have a thousand living at Blaine within a month."

This was the statement made vesterday gressive competition of independent pro-

Mining World's Review of the Market for Past Week Scents a Rise to \$5.

District's Mineralization Unique.

The mineralization of the Granite district is unique. Two parallel veins, or surface croppings, one of gold quartz and the other of silver-lead, run for more than thirty miles north and south between Cherry creek and Hercules gap. The showing is so flattering that several companies are now in a state of formation to work properties they have acquired within the past few days.

Yesterday every miner employed by the Blaine company, believing from what they saw that they were letting a fortune slip by working for wages, threw down their tools and went into the hills to prospect. This caused a cessation of work until yesterday about noon, when other men were brought down from Ely by Superintendent Clark.

The approach to the mines is easy, a good wagon road running down grade to Shepard, where preparations for building a depot, placing sidetracks and ore platforms are already under way.

TOULICE OF HALL ICTED

what during the past three months, and we are advised that the principal sellers are experiencing dull business. There appears to be a feeling prevailing that European consumers will not replenish their stocks until the market for their manufactures improves, and no matter how much the price is shaded the lead market does not seem to gain orders. May be with the betterment of trade in the United States there shall also return to Europe the prosperity for which lead producers are waiting so anxiously. It will also be instructive to watch the effect of the expiration on June 20 of the United States imported II,078,557 pounds of lead (in ore and base bullion) from Canada.

STOCKS DOUBLE IN VALUE

SINCE FIRST OF YEAR

Selling value to totals being doing considerable prospecting and surface development work the point at the interval sate that the principal sellers will do during the market to replicate the original considerable prospecting and surface development work the point at the list hard to predict what the market will do during the coming week, but it is hard to predict what the market are experiencing dull business. RICH ORE BODIES ARE FOUND IN MINES AT WARD

(Special to The Herald.) (Special to The Herald.)

Ely, March 26.—Confirmation of the reported strike at the Ward Mountain property of the United Nevada Mines company, one of the richest mines in former times in White Pine county, was received here yesterday in the form of samples of black silver-lead ore assaying from 800 ounces up in silver. Twelve feet of this ore has been sunk through, the vein broadening from twelve inches to five feet.

to five feet.
From a shoot similar to the one now From a shoot similar to the one now being worked, values of more than \$3,-000,000 were secured in the late seventies. The shoot was lost, however, and since that time nothing but low-grade ore has been found. Last Monday the strike was made, and Superintendent Gates has since been constantly on the ground. Sacking of the bonanza ore is going ahead under his direct supervision to prevent any high grading.

tive, today sent a telegram to the east-ern directors of the company, in which he declared that in his opinion the pros-pects of recovering the old shoot are very flattering. very flattering.

It is with great joy that the local field greets the ore find, as the United Nevada property lies only about seven miles northwest of Ely. The property at one time furnished a livelihood for 3,500 people, Ward being one of the largest settlements in the county until the old snoot was lost. With the recovery of the shoot there is little doubt that renewed activity will be evident. At present thirty miners are employed.

Sharp's postoffice, about fifteen miles from the mines has recently been established and the operators of the district are now making arrangements to secure telegraphic communication with the district."

Mining Notes.

KINSLEY DISTRICT IS COMING TO THE FRONT

telegraphic communication with the out-side world. Freiburg is beginning to

After a trip of inspection to the properties of the Kinsley Development company, in the Kinsley mining district, west of Deep Creek, Manager Newton Dunyon is now convinced that the principal ore shoots that have been under development are going to the deep.

"While we have been doing work out there for the past three years." said Mr. Dunyon yesterday, "the comparative isolation of the district and the successive booms of Nevada gold camps, together with difficulties in securing and keeping competent miners, have made results come slower than they ought to

sults come slower than they ought to have done. We are getting along first rate now, however, and I believe this will be the best year we have had. In open cuts and in prospecting shafts a great deal of material has been moved. The Tel. Bell 792. first shoot of ore we encountered was cut off with a porphyry dyke. We have now traced it up and found the point where it is going down and, during the season we shall tap it at considerable depth in a cross-cut from a working shaft! we are now putting down. Where exposed, there is now from two to three

needed in the way of tools and equip-ment for a genuine campaign of real mining.

Same lode we have open to the fine ore running well in copper and, now that we are getting down to where the formation will be found in place, we have The Tri-Metallic company, operating on the south side of the Wyoming, has been pushing work for a long time and now boasts a developed mine that is attracting wide attention. Other properties in the district are being rounded into form with vigor and men from all over the country are being attracted to the district.

There is a perfect network of ledges, and it seems to me that a great many big mines will eventually be developed there. Labor conditions are much improved, and that will result in a season of telling work in different parts of

L. L. Gordon, who has become so prominently identified with the new camp of Gold Circle, is back home for a few days The Taylor & Brunton sampling works yesterday reported the release of seven carloads of Utah ore. The Pioneer sampler released one car.
